

Practical 18

The screenshot shows the Android Studio interface. On the left is the Project Navigational Drawer with the following structure:

- Android
- app
 - manifests
 - java
 - com.example.sqlitedatabase
 - DBHandler
 - MainActivity
 - com.example.sqlitedatabase (androidTest)
 - com.example.sqlitedatabase (test)
 - java (generated)
 - res
 - drawable
 - layout
 - activity_main.xml
 - mipmap
 - values
 - xml
 - res (generated)- Gradle Scripts

The main area is the code editor showing Java code for `DBHandler.java`:public class DBHandler extends SQLiteOpenHelper {
 private static final int DB_VERSION = 1;
 private static final String TABLE_NAME = "mycourse";
 private static final String ID_COL = "id";
 private static final String NAME_COL = "name";
 private static final String DURATION_COL = "duration";
 private static final String DESCRIPTION_COL = "description";
 private static final String TRACKS_COL = "tracks";
 public DBHandler(Context context) { super(context, TABLE_NAME, null, DB_VERSION); }
 @Override
 public void onCreate(SQLiteDatabase db) {
 String query = "CREATE TABLE " + TABLE_NAME +
 "(" + ID_COL + " INTEGER PRIMARY KEY AUTOINCREMENT,
 " + NAME_COL + " TEXT, "
 " + DURATION_COL + " TEXT, "
 " + DESCRIPTION_COL + " TEXT, "
 " + TRACKS_COL + " TEXT)";
 db.execSQL(query);
 }
}

The status bar at the bottom indicates the file path as `SQLiteDemo > app > src > main > java > com > example > sqlitedatabase > DBHandler > TRACKS_COL`, the current time as `19:30 (1898 chars, 56 line breaks)`, and encoding as `CRLF UTF-8 4 spaces`.

हाँ, आपका कमांड सही है और आपने उसे सही जगह पर चलाया है—platform-tools फोल्डर में, जहाँ adb.exe होता है।

अगर कोई error नहीं आया है और command prompt में फिर cursor आ गया है, इसका मतलब आपकी डाटा फाइल `coursedb.sqlite` आपके इसी फोल्डर में क्रिएट हो गई है।

अब आगे क्या करें:

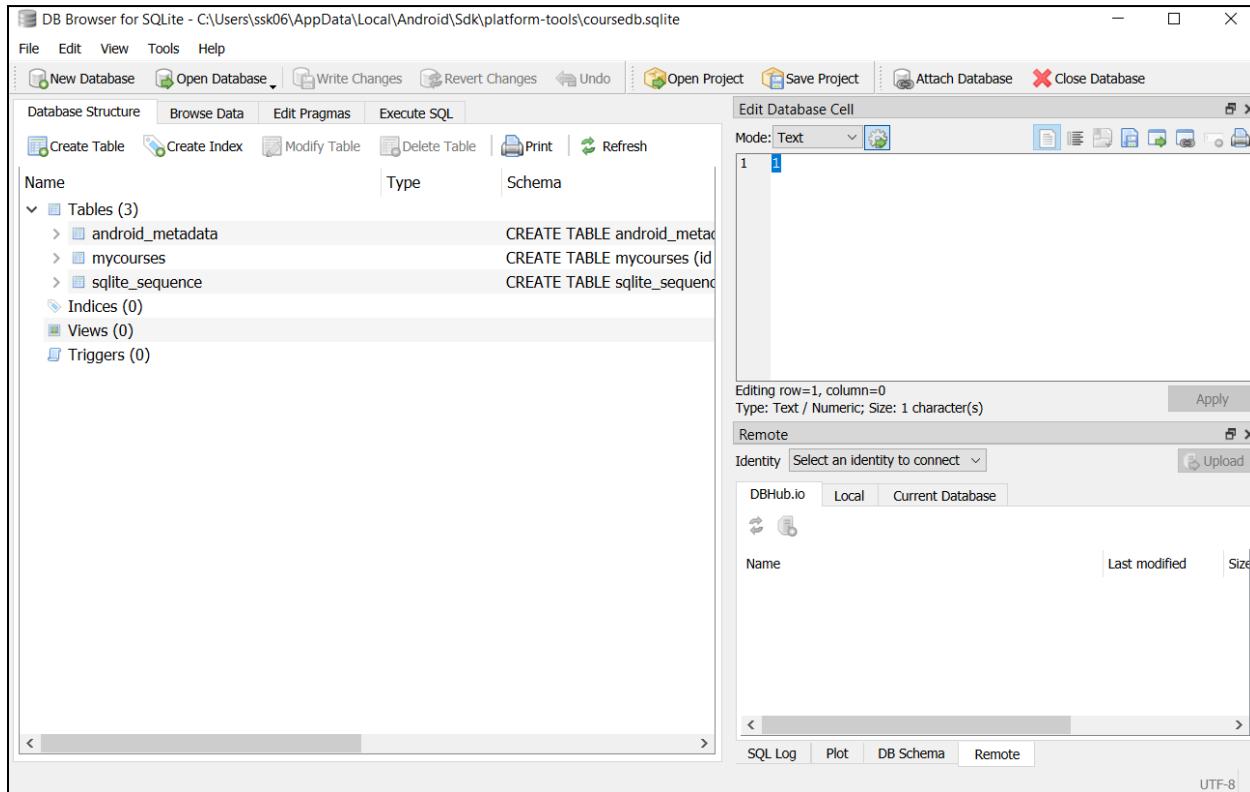

1. उस फोल्डर (**platform-tools**) में जाएँ और देखिए कि `coursedb.sqlite` फाइल वहाँ बनी है या नहीं।
 2. **DB Browser for SQLite** ओपन करें।
 3. **Open Database** पर क्लिक करें और `coursedb.sqlite` सेलेक्ट करें।
 4. ऊपर "Browse Data" टैब में जाएँ, Table dropdown से `mycourses` सेलेक्ट करें।
 5. अब आपके Android ऐप का डेटा दिखेगा।

अगर फाइल नहीं दिख रही है:

- रिफ्रेश करें या Windows Explorer में platform-tools फोल्डर चेक करें।
 - फोल्डर या path सही है तो ज़रूर फाइल दिखाई देगी।

अब आप आराम से DB Browser में पूरा डेटा देख सकते हैं!

अगर कोई दिक्कत या next step पूछना हो, बताएं।
